PROFESSIONAL SUMMARY

Software Developer skilled in MERN stack development, RESTful APIs, and scalable web applications. Proficient in Java, JavaScript, React.js, Node.js, Express.js, MongoDB, PostgreSQL, and Data Structures & Algorithms.

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern | AIVI Technologies *Feb 2026 – Present*
Smart Attendance & Leave Management System Live Demo

- Developed and maintained enterprise-grade web application features using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB, improving application reliability and feature coverage.
- Implemented geolocation-based employee check-in/check-out and attendance management system with secure JWT-based user authentication, reducing manual HR tracking effort.
- Designed and integrated RESTful APIs following industry best practices; performed debugging and API testing using Postman in an Agile/Scrum environment with Git version control.

Artificial Intelligence Intern | Acmegrade | Certificate *May 2025 – Jul 2025*

- Built a Spam/Ham text classification system using NLP techniques, TF-IDF vectorization, and CNN-based deep learning models, achieving measurable improvements in precision and F1-score.
- Developed end-to-end ML pipeline covering text preprocessing, tokenization, feature extraction, model training, and hyperparameter tuning using Python and scikit-learn.
- Evaluated model quality with accuracy, precision, recall, and F1-score metrics, ensuring production-ready performance of the classification pipeline.

PROJECTS

CureX — Doctor Appointment System — MongoDB, Express.js, React.js, Node.js, Tailwind CSS *Live Demo*

- Architected a full-stack doctor appointment platform with patient booking, doctor onboarding, JWT-based authentication, and Role-Based Access Control (RBAC) for User, Doctor, and Admin roles.
- Developed 10+ RESTful APIs using MVC architecture; integrated Cloudinary for cloud media storage and connected 5+ React frontend pages with backend appointment workflow services.
- Implemented secure, scalable backend logic ensuring data integrity across 3 user roles with responsive Tailwind CSS UI components.

Hanuman — AI SaaS Platform — React.js, Node.js, Express.js, PostgreSQL, OpenAI API *Live Demo*

- Built an AI-powered SaaS platform for automated content generation and resume creation by integrating OpenAI APIs into a Node.js/Express.js backend with PostgreSQL data persistence.
- Developed 3 AI content generation workflows with responsive React.js frontend; implemented backend validation, error handling, and API integration with average response time under 2 seconds.

Airbnb Clone — Full Stack Web Application — Node.js, Express.js, MongoDB, JavaScript, HTML, CSS *Live Demo*

- Built a production-grade rental listing platform supporting property listings with search, filtering, and secure session-based user authentication using modular MVC architecture.
- Designed and implemented RESTful APIs with MongoDB-backed data management; deployed on Render with scalable, maintainable backend routing and CI/CD via GitHub Actions.

EDUCATION

B.Tech in Computer Science Engineering (CSE) | Parala Maharaja Engineering College, Berhampur, Odisha *Aug 2023 – May 2026*

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), HTML5, CSS3, SQL
Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, MVC Architecture
Databases: MongoDB, PostgreSQL, MySQL
Tools: Git, GitHub, GitHub Actions (CI/CD), Postman, VS Code, Antigra
Cloud & Storage: Cloudinary,Vercel, DigitalOcean,Render, Mongodb Atlas

AI / ML: NLP, CNN, scikit-learn, TF-IDF Vectorization, OpenAI API Integration
Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming
Methodologies: Agile/Scrum

CERTIFICATIONS

- **Full Stack Web Development using Python** — View Certificate
- **MERN Stack Development** — View Certificate
